

Clayton Parnell

Application Specialist | Application Support | Business Systems

(214) 843-4999 | claytongparnell@gmail.com | clayparnell.com | github.com/cparn8

SUMMARY

Application-focused IT professional with hands-on experience supporting users, tickets, documentation, access workflows, and business-critical technology operations. Software Engineering graduate with a foundation in application behavior, REST APIs, data models, validation logic, troubleshooting, and system reliability.

TECHNICAL SKILLS

- **Application Support:** User Troubleshooting, Ticket Triage, Application Workflows, Account/Access Issues, Permissions/Roles, Documentation, Escalation
- **Systems Tools:** ServiceNow, Google Workspace/Admin, Skyward Qmlativ, TipWeb-IT, Cisco Meraki, Windows, ChromeOS
- **Technical Foundation:** React, TypeScript, Python, Django REST Framework, PostgreSQL, REST APIs, Git/GitHub, Docker, AWS, QA/Regression Testing
- **Operations:** Incident Tracking, Staff Training, Process Documentation, Workflow Improvement, Data Integrity

EXPERIENCE

- **Campus Technology Assistant** April 2026 – Present Garland ISD | Shugart Elementary
 - Serve as the primary on-site technology support resource for staff, students, devices, tickets, and daily technology operations
 - Support users across district applications, Google Workspace/Admin workflows, account access issues, devices, and troubleshooting requests
 - Assist staff with Skyward Qmlativ access, data visibility questions, system usage issues, and application-related escalations
 - Track, prioritize, document, and resolve support requests through ServiceNow while maintaining clear end-user communication
 - Troubleshoot account, application, endpoint, connectivity, classroom technology, and workflow issues across a mixed technology environment
 - Create user-facing documentation, procedural guides, and staff communications to reduce recurring issues and improve technology adoption
 - Coordinate with district technology teams to escalate issues, validate resolutions, and maintain continuity of campus operations
- **Live A/V and Technical Operations** 2017 – Present Freelance | Dallas, TX
 - Designed and operated audio/video systems requiring high reliability and real-time troubleshooting
 - Diagnosed hardware, cabling, signal-flow, and configuration problems under time-sensitive conditions

PROJECTS

- **Healthcare Scheduling SaaS Platform** | React, TypeScript, Django REST Framework, PostgreSQL, Docker, AWS
 - Built a full-stack business application supporting provider scheduling, patient records, appointment workflows, locations, business hours, blocked time, and recurring appointments
 - Designed backend validation and business rules for appointment conflicts, scheduling constraints, data consistency, and operational reliability
 - Developed REST APIs, relational data models, authentication flows, frontend scheduling views, QA documentation, and application-support scenarios

EDUCATION

- **Western Governors University** 2025 B.S. Software Engineering

CERTIFICATIONS

- ITIL 4 Foundation
- AWS Certified Cloud Practitioner
- CompTIA Project+
